Description

ASTER is a younger brother of our famous high-end TITAN ETU, designed to give you a tactical advantage at an attractive price. Our 4th generation Control System will give you maximum reliability and protection together with tons of useful functions such as **binary trigger**, burst mode, active brake and other essentials. One of the biggest advantages of ASTER V3 is the optical trigger sensor - the same as in TITAN V3! Gain a unique tactical advantage thanks to extremely fast trigger response - **up to 6 milliseconds**! Give your AEG a new lease of life!

The BASIC firmware edition is an economic version with a limited number of functions, dedicated for those who prefer simplicity but require the highest quality. If you decide to have more functions, there is always an option to upgrade firmware from BASIC to ADVANCED or EXPERT.

Kit contents:

ASTER Module with BASIC firmware edition

ASTER Patch

2x 'Programming via Trigger' Card

Installation Kit

Quickstart Guide

NOTICE!

- You can configure basic functions of your ASTER using only the trigger. In order to configure more functions, connect your ETU with GCS App via USB-Link or Blu-Link dongles, available as separate components - not included in this kit.
- ASTER V3 is not compatible with replicas equipped with Arcturus gearboxes.
- In G36 replicas, ASTER LED lights are not visible due to body design. Programming and adjusting the settings can be done by following vibrations or by connecting with GCS App.
- Gearbox and smartphone visible on photos are not included.
- GATE does not guarantee the compatibility of mosfets and ETUs such as TITAN or ASTER with brushless motors. Connection of a brushless motor can cause immediate damage to the device, motor and battery, that is not covered by the warranty and can lead to a fire.
