Description

An adjustable speed trigger designed especially for pros using TITAN V2 for the greatest accuracy and overcoming the limits. Enjoy simple and precise hair-trigger adjustment on any sensor you want. Shoot faster thanks to over-travel control. Make the most of the compatibility with any gearbox wherever standard V2 trigger fits, including HPA. Select from multiple shapes and colors to suit the style and type of your games. All of this with ultra-high quality of 7075 aircraft grade aluminum CNC machining.

Features:

- Designed especially for TITAN V2
- Pre-travel screw - hair-trigger adjustment
- Over-travel screw - limit trigger movement from outside the rifle body and shoot faster
- Long-Lok system against loose screws
- Full compatibility with TITAN V2 allowing the use of all 5 sensors
- Full compatibility with HPA engines and standard V2 trigger contacts
- Multiple shapes and colors to suit the style and type of your games
- Ultra-high quality of aircraft-grade aluminum CNC machining
- No modification of AEG required
- Compatibility with ASTER V2 as a standard trigger*
- Dedicated especially to pros and skilled users

Compatibility:

- All standard V2 gearboxes;
- TITAN V2;
- Standard trigger contacts;
- HPA engines;
- ASTER V2*.

*The Nova Trigger installed in ASTER V2 ETU acts as a standard adjustable trigger and doesn't increase trigger sensitivity range such as the Quantum Trigger.

Please note that due to different screen settings and light conditions, the color of the products in the pictures may be slightly different than the actual item. Color differences may also occur between different batches of the product.

The price applies to 1 trigger.
