Description

**TITAN™**

**TITAN V2 NGRS Basic Module** – the best if you long for having TITAN in two or more airsoft guns. Then you do not need the second USB-Link from the Advanced set. It includes TITAN with **BASIC** firmware edition.

The BASIC firmware edition is an **economic version** with limited number of functions, dedicated for those who prefer simplicity but require highest quality. If you decide to have more functions, there is always an option to [upgrade firmware from BASIC to ADVANCED or EXPERT](#).

**Kit contents:**

1. TITAN V2 NGRS with BASIC firmware edition (rear or front wired)
2. Installation Kit
3. Quickstart Guide

NOTICE! In order to configure TITAN, you need the USB-Link which is not included in this kit.

**TITAN V2 NGRS™** is an AEG Control System for **Tokyo Marui V2 Next Generation Recoil Shock** gearboxes.

Transform your Tokyo Marui Next Generation AEG into an advanced training weapon system. Adjust your weapon and check the Statistics using USB-Link and GATE Control Station app for **PC, Mac and Android devices**. TITAN V2 NGRS has a whole new trigger sensor, which allows setting hair trigger with ludicrous precision: at least **50 sensitivity levels for first millimeter** of trigger movement. The innovative 3rd generation trigger sensor offers you even **420 possible sensitivity settings**. Gain a unique tactical advantage thanks to the extremely fast trigger response and lots of other useful functions. Boost your AEG with computerized technology. Give your AEG a new lease of life!

Thanks to the optical sensors, we eliminated the problem of faulty switches that can occur in competitors' drop-in MOSFETs. The trigger has no mechanical connections with the PCB. This eliminates mechanical stresses and provides for high reliability.

Please note: Gearbox and smartphone are not included.

Please note that material and colour of insulation washers included in the kit may differ between different batches.

Warning!

GATE does not guarantee the compatibility of mosfets and ETUs such as TITAN or ASTER with brushless motors. Connection of a brushless

motor can cause immediate damage to the device, motor and battery, that is not covered by the warranty and can lead to a fire.
